

Silencing of LncRNA SNHG16 Downregulates Cyclin D1 (CCND1) to Abrogate Malignant Phenotypes in Oral Squamous Cell Carcinoma (OSCC) Through Upregulating miR-17-5p [Retraction]

Wang Q, Han J, Xu P, Jian X, Huang X, Liu D. *Cancer Manag Res.* 2021;13:1831—1841.

We, the Editors and Publisher of the journal *Cancer Management and Research*, are retracting the published article.

Since publication, concerns have been raised by a third party regarding the integrity of the data in this article. Subsequently, the authors informed the Editor about the significant concerns regarding the reliability of the data presented in the article and so, have requested the retraction of the article.

As the Editor and Publisher also have concerns about the integrity of the reported results, all parties have agreed to retract the article to ensure correction of the scholarly record.

We have been informed in our decision-making by our editorial policies and the COPE guidelines.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as “Retracted”.

Cancer Management and Research

Publish your work in this journal

Cancer Management and Research is an international, peer-reviewed open access journal focusing on cancer research and the optimal use of preventative and integrated treatment interventions to achieve improved outcomes, enhanced survival and quality of life for the cancer patient. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
