The Potential Value of Prehabilitation for Preventing Delirium in Elective Surgery for Aneurysms of the Abdominal Aorta [Corrigendum]

Meulenbroek AL, Steyerberg EW, Janssen TL, van Mil SR, Faes MC, van der Laan L. Clin Interv Aging. 2024;19:51-55.

Page 51, Abstract, Results section, last sentence, the text "Also, patients in the prehabilitation group had a small, nonsignificant decreased length of hospital stay (4 days) compared to the control group (5 days) (p=0.07)" should read "Length of hospital stay was significantly shorter after prehabilitation in both the total group (5 days in control, 4 days after prehabilitation, p=0.02, Mann–Whitney U-test) and in the EVAR group (4 days in control, 3 days after prehabilitation, p=0.001)".

The authors apologize for this error.

Publish your work in this journal

Clinical Interventions in Aging is an international, peer-reviewed journal focusing on evidence-based reports on the value or lack thereof of treatments intended to prevent or delay the onset of maladaptive correlates of aging in human beings. This journal is indexed on PubMed Central, MedLine, CAS, Scopus and the Elsevier Bibliographic databases. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit http://www.dovepress.com/testimonials.php to read real quotes from published authors.
