

Long Non-Coding RNA HAND2-AS1 Inhibits Growth and Migration of Gastric Cancer Cells Through Regulating the miR-590-3p/KCNT2 Axis [Retraction]

Yu L, Li H, Li Z, et al. *Onco Targets Ther*. 2020;13:3187–3196.

The Editor and Publisher of *OncoTargets and Therapy* wish to retract the published article. Concerns were raised over alleged image duplication in Figures 2D and 3D with similar images from an unrelated article, specifically:

- Figure 2D, panels pcDNA3.1 and pHAND2-AS1 appear to have been duplicated with similar images in Figure 5C from Kang et al, 2019 (https://doi.org/10.2147/OTT.S204004).
- Figure 3D, panels si-NC and si-HAND2-AS1 appear to have been duplicated with similar images in

Figure 5C from Kang et al, 2019 (https://doi.org/10.2147/OTT.S204004).

The authors did not respond to our queries and the Editor determined the findings of the study were no longer valid and advised for the article to be retracted.

Our decision-making was informed by our policy on publishing ethics and integrity and the COPE guidelines on retraction.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as "Retracted".

OncoTargets and Therapy

Publish your work in this journal

OncoTargets and Therapy is an international, peer-reviewed, open access journal focusing on the pathological basis of all cancers, potential targets for therapy and treatment protocols employed to improve the management of cancer patients. The journal also focuses on the impact of management programs and new therapeutic

agents and protocols on patient perspectives such as quality of life, adherence and satisfaction. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit http://www.dovepress.com/testimonials.php to read real quotes from published authors.
