

## LncRNA ANCR Suppresses the Progression of Hepatocellular Carcinoma Through the Inhibition of Wnt/ $\beta$ -Catenin Signaling Pathway [Retraction]

Song X, Xu X, Ren X, Ruan X, Wang Y, Yao TT. *Onco Targets Ther.* 2020;13:8907–8917

At the authors request, the Editor and Publisher of *OncoTargets and Therapy* are retracting the published article. The authors found errors in the article, including the duplication of images in Figure 3. Specifically,

- The image used for Figure 3A, HCCLM3, Vector, was duplicated with the image for Figure 3B, HCCLM3, Control.

The authors informed the journal that they were unable to provide adequate data to verify the findings and requested a retraction. The editor agreed with this decision.

We have been informed in our decision-making by our policy on publishing ethics and integrity and the COPE guidelines.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as “Retracted”.

### Publish your work in this journal

OncoTargets and Therapy is an international, peer-reviewed, open access journal focusing on the pathological basis of all cancers, potential targets for therapy and treatment protocols employed to improve the management of cancer patients. The journal also focuses on the impact of management programs and new therapeutic agents and protocols on patient perspectives such as quality of life, adherence and satisfaction. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
