

## Addressing the Missing Links in Cardiovascular Aging [Corrigendum]

Dinetz E, Zeballos-Palacios C, Martinez CA. *Clin Interv Aging*. 2024;19:873–882.

Page 874, The Microbiome and Cardiovascular Aging, sixth sentence, the text “Specifically, aging and age- related pathology including CAD appears to be linked to the relative abundance of the phyla Firmicutes, which increases with age, and a decrease in Bactericides” should read “Specifically, aging and age- related pathology including CAD appears to be linked to the relative abundance of the phyla Firmicutes and Bacteroidetes”.

The authors apologize for this error.

### Publish your work in this journal

Clinical Interventions in Aging is an international, peer-reviewed journal focusing on evidence-based reports on the value or lack thereof of treatments intended to prevent or delay the onset of maladaptive correlates of aging in human beings. This journal is indexed on PubMed Central, MedLine, CAS, Scopus and the Elsevier Bibliographic databases. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
