

Participate in a research study evaluating brain activity during speaking

Functional near-infrared spectroscopy (fNIRS) cap

Participant Requirements:

- Adults 18+ years old
- No history of neurological impairment
- Normal or corrected to normal vision and hearing

Commitment:

- You will wear a cap on your head that will use near-infrared light to measure your brain's activity while you are answering questions and watching short videos.
- 1 session of 2-3 hours

Compensation:

You will receive a gift card of \$25 for each hour of participation.
