

Boston University Marine Program Lecturer Position – Marine Megafaunal Ecology

The Marine Program at Boston University invites applications for a part-time Lecturer beginning September 1, 2019 to teach a Marine Megafaunal Ecology course as part of the Marine Semester. The Marine Semester is an intensive research-based semester offered to Marine Science majors, minors, and graduate students. We seek a colleague with a strong commitment to undergraduate education and a track record of excellence in teaching. Responsibilities include correspondence with partners to plan course logistics and teaching a research-based course.

Course dates are September 5th – September 30th. In addition to classroom and laboratory instruction, the instructor will lead student data-gathering activities on up to 10 research cruises aboard a NOAA research vessel operated by the staff of the Stellwagen Bank National Marine Sanctuary.

The successful candidate will have a thorough understanding of New England's marine megafauna and ecological principals, experience leading groups in the field, and have prior teaching experience. Must hold a Ph.D. in a related field. A competitive salary (1-month) is offered.

Please submit a cover letter, curriculum vitae, and statement of teaching philosophy to Wally Fulweiler (rwf@bu.edu) and Julia Hammer Mendez (hammer@bu.edu). Please arrange for three letters of reference to be submitted to the same addresses. All applications must include "Marine Semester Lecturer" in the subject line. Review of applications will begin March 26, 2019 and will continue until the position is filled. Inquiries about the position or application process can be addressed to the BU Marine Program Director, Wally Fulweiler at rwf@bu.edu.

Please visit the following website for additional information about the Marine Program (<http://www.bu.edu/bump/>). Boston University is an Equal Opportunity, Affirmative Action employer.
