JOB OPPORTUNITIES WILL BE DISCUSSED - Bring your résumé

At CVS Health, our analytics teams are working to develop efficient ways to use our vast data sets to build a competitive advantage. We're working on new initiatives that give data the power to help us reinvent pharmacy to drive value to our customers. We use data visualization to help demystify billions of rows and columns of data; leverage internal and external data sources and advanced predictive modeling techniques to identify the interests and behaviors of our customers and we develop algorithms that predict medication adherence for more than 75 million of our customers. **We are seeking the brightest analytical talent** to help us continue to leverage data insights to *Help People on the Path to Better Health*.
