

Clinical Research Training Requirements and Opportunities for Residents Henry M. Goldman School of Dental Medicine

According to the Henry M. Goldman School of Dental Medicine Clinical Research Policy, all incoming residents are required to attend a Clinical Research Training session. This training has been mandated as part of GSDM Postdoctoral Matriculation since 2018.

Clinical Research Training is comprised of training on the GSDM Research Study Design Worksheet

- Reviews 'Research Study Design Worksheet', provides guidelines for completion of the worksheet, and reviews resources available
- Reviews guidelines and best practices for conducting research generally
- Provides a basic introduction to clinical research resources at GSDM

Additional Training Opportunities at the Discretion of Program Directors and/or Research Mentors

- BUMC Clinical Research Resources Office (CRRO) Training (recording and slides available on GSDM Clinical Research Resources Blackboard site)
 - Provides information about Human Subjects Protection
 - Instructs how to submit a proposal to the IRB
 - Instructs on how to conduct a Study
- CITI Training Options include:
 - Responsible Conduct of Research
 - Human Subjects Protection Training
 - BUMC HIPAA and Research Data Security
 - Community-Engaged Research
 - Laboratory Animal Research
 - Conflicts of Interest
 - Research Study Design (RSD)
 - BMC/BU Medical Campus Standard Operating Procedures
- Program Directors and/or research mentors may recommend other research project-specific training, e.g. training on specific clinical protocols or laboratory procedures.
- Clinical Research Training is further reviewed/reinforced in the OB830 Research Writing course as well as in other program-specific research courses.
