

SUSTAINABILITY POLICY AND AGREEMENT

As an employee/contracted agent/student, I understand that Boston University, Student Health Services aims to grow and maintain their green certification as an environmentally conscious department. In order to achieve this, the employees at Student Health Services are encouraged to create awareness around sustainability and take appropriate actions to make a positive impact. Student Health Services maintains this commitment by complying with Boston University's Sustainability Department to create a welcoming and healthy environment, while educating Student Health Services employees in the process of carrying out their job in a safe and environmentally responsible way.

For more information on BU Sustainability, please visit sustainability@BU

I have reviewed and understand the Boston University, Student Health Services Sustainability Policy.
